

RELIABLE SATELLITE CONNECTIVITY AT A FRACTION OF THE COST

Enterprises are constantly looking for reliable and affordable satellite connectivity in remote areas so that their business operations can realise its full potential. To stay cost competitive, enterprises can consider flexible and contract-free data usage plans to ensure uninterrupted connectivity.

Singtel Flexi-SATIP service is designed to offer enterprises greater flexibility and is suitable for light internet surfing, emails and chat applications.

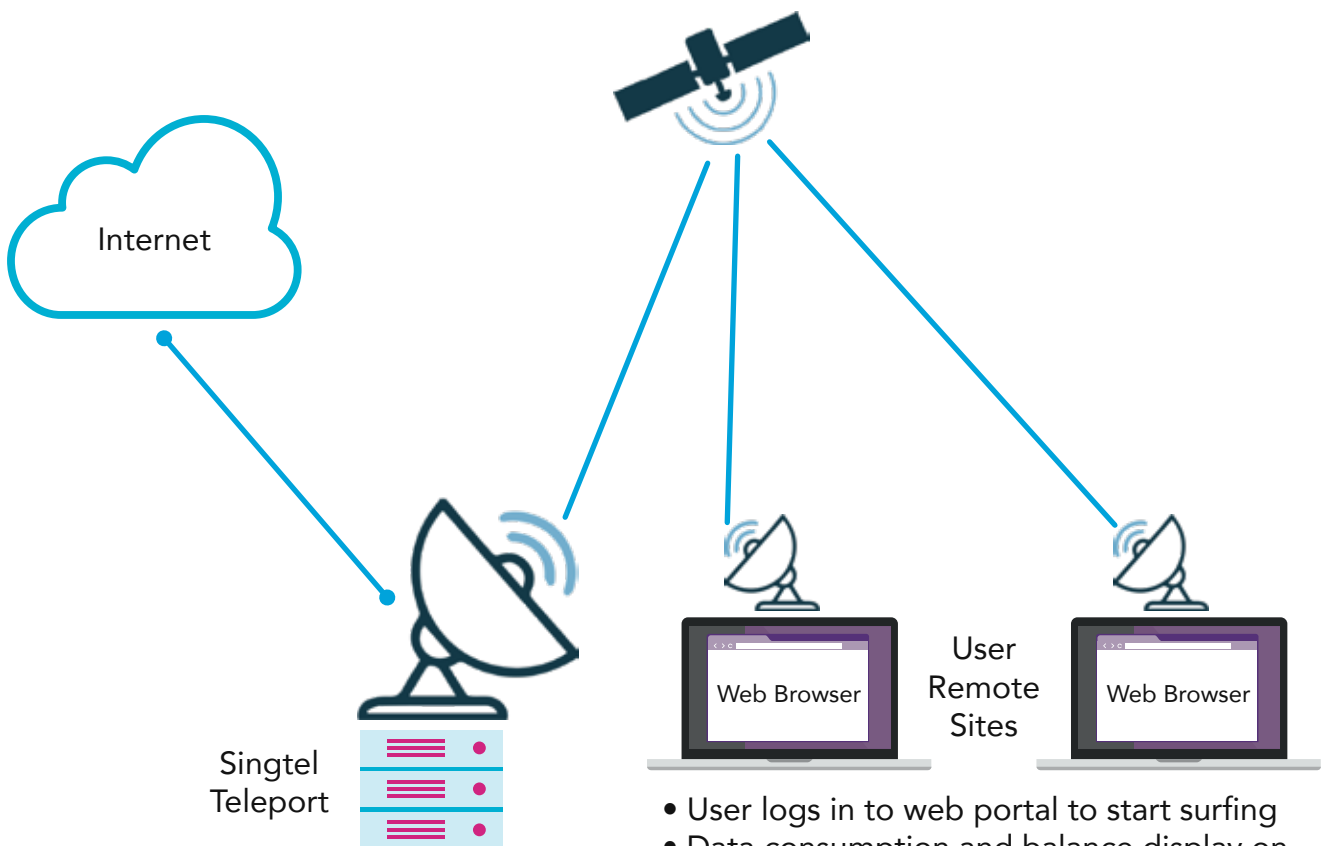

Features

- Different data plans to suit various business needs and budget requirements
- Up to 10Mbps downlink / 1Mbps uplink
- Data plan is valid for 30 days

Benefits

- No contract, no hidden charges
- No excess charges will be incurred after data plan has been fully utilised
- Pay for what you need only

How it works?

- User logs in to web portal to start surfing
- Data consumption and balance display on the web portal
