

ORILLA LITE

THE RELIABLE COMMUNICATION NETWORK

Singtel has launched a slimmed down version of its full-powered Orilla Service - offering the same core features and benefits of Orilla, at a lower cost. Orilla Lite was designed as a cost- and time-efficient solution for vessels that wish to improve the connectivity and cybersecurity onboard their vessels, without having to make large investments.

Singtel Orilla Lite provides a solution for everything needed to have your vessel's communication network run in a professional, fast and controlled manner. Orilla Lite provides a solid foundation on which to build your entire vessel's communication network. While enforcing key network cyber security controls.

Designed to be compatible with all communication methods, current and future, it can provide excellent controlled connectivity to virtually all networks.

Orilla Lite was developed to provides enterprise level capabilities while minimizing the hardware and installation cost, resulting in an efficient method in improving the management and cyber security features on any vessel.

Fully shoreside managed by our SOC

Orilla Lite makes use of an easy to understand web portal to manage all functionalities, no advanced management infrastructure is needed onboard the vessel to implement the service.

It has a core feature set containing two components: patch management and the remote desktop gateway.

PATCH MANAGEMENT

The patch management component allows the user to update and patch the operating systems and applications used on board. Updates are redistributed using the network so they only have to be downloaded once on every vessel, saving you bandwidth and airtime costs.

REMOTE CONTROL

The remote desktop gateway facilitates a connection to each vessel's devices using a variety of standard network protocols, enabling better security and more control over all systems on board.

FEATURE

Managed Window server for your vessel that gives the user the possibility to control the network

File storage

Full redundant backup solution for all vessels' networked PC's

Vanir Lite (endpoint security) for all PC's onboard

UTM (Unified Threat Management) solution

Backup communication PC always available via Orilla Mail

Fully managed by Singtel

3 year warranty on the hardware

Remote desktop management

Patch management

Webportal to manage software components
