

DARK WEB MONITORING SERVICE

In an era fraught with cyber threats, safeguarding your organisation's data is paramount. Utilise Singtel's Dark Web Monitoring Service – a blend of cutting-edge tech and expert monitoring – to shield your sensitive data from dark web perils. Be alerted immediately to critical threats and stay ahead of emerging ones to stay ahead of adversaries at all times.

BENEFITS

Protect business reputation

Take control of the security of your digital identity and prevent cybercriminals from exploiting it by staying one step ahead of potential threats.

Safeguard your finances

Mitigate the risk of financial fraud and unauthorised access to your accounts by enlisting our comprehensive monitoring capabilities.

Ensure regulatory compliance

Uphold data protection regulations and avoid costly penalties associated with data breaches by maintaining constant vigilance over sensitive digital data.

Gain peace of mind

Alleviate your worries by providing round-the-clock protection for your digital identity.

Our intelligence pillars

We empower organisations with 360° real-time visibility into the cybercriminal underground, allowing you to anticipate and defend against cybercriminals before they strike. By adopting a proactive approach to cyber security, organisations can safeguard their reputation, assets, and sensitive information from the ever-evolving dangers of the digital underworld.

Malware intelligence

Provides continual surveillance of malware activities at command-and-control level, delivering timely and accurate insights on various malware, helping your organisation in maintaining a proactive cyber security posture at all times.

Credential intelligence

Ensures complete coverage across underground marketplaces and actively alerts organisations whenever new compromised credentials are detected, effectively mitigating the risks associated with compromised credentials.

Vulnerability intelligence

Delivers relevant and timely information on vulnerability gaps tailored to your environment and stack, enabling you to prioritise patches effectively through analysis-driven assessments and reports.

Adversary intelligence

Offers proactive and ground-breaking insights on top-tier cybercriminals, empowering you to take precautionary steps to defend against them before they strike.

WHY CHOOSE SINGTEL?

We deliver time-sensitive, reliable, and relevant insights collected by intelligence experts worldwide. These insights are customised for your organisation, supported by evidence, and presented in an easy-to-digest format. Leveraging state-of-the-art technology and backed by our award-winning Managed Security Service Provider (MSSP) accolades, our experienced threat intelligence analysts ensure all-rounded intelligence to meet all your security needs.

Comprehensive and actionable reports: Insights are supported with evidence and recommended actions by in-house experts, consolidated in easy-to-consume reports.

Personalised insights: Gain valuable insights into potential vulnerabilities in your online presence, empowering proactive measures to enhance cyber security.

Proactive monitoring and alerts: Quick turnaround and 360° worldwide coverage by intelligence experts.
