

# Hit accelerate on 5G adoption with Singtel CODE

Get on a journey of discovery at Singtel Centre of Digital Excellence (CODE) and learn how 5G can turbocharge your digital transformation and take your business to new heights.

## Six reasons to arrange a CODE consultation

1. Experiment in our secure 5G sandbox environment
2. Brainstorm in an open forum workshop
3. Use our large-scale testing space for applications
4. Experiment with our 5G test devices or BYODs
5. Enjoy the security of virtual private networks
6. Leverage on-site technical and developer support

## What can you do at CODE

 <p><b>Biz discovery</b> An essential discovery workshop that matches business problems to Singtel's 5G capabilities.</p>	 <p><b>Hackathon</b> An intensive innovation session that creates working prototypes from shortlisted ideas.</p>
 <p><b>Innovation insights</b> A co-development programme that lets you ideate, build and test your prototype.</p>	 <p><b>Ecosystem development</b> A valuable opportunity to build, test and scale your apps in a secure 5G sandbox environment.</p>

## Spotlight on... Biz discovery

- See what's possible when your stakeholders meet our 5G experts
- Leverage design thinking methodology to map out business problems and match them to Singtel technology
- Start to consider how to ideate and prototype your own 5G solutions for your business

## Spotlight on... Hackathon

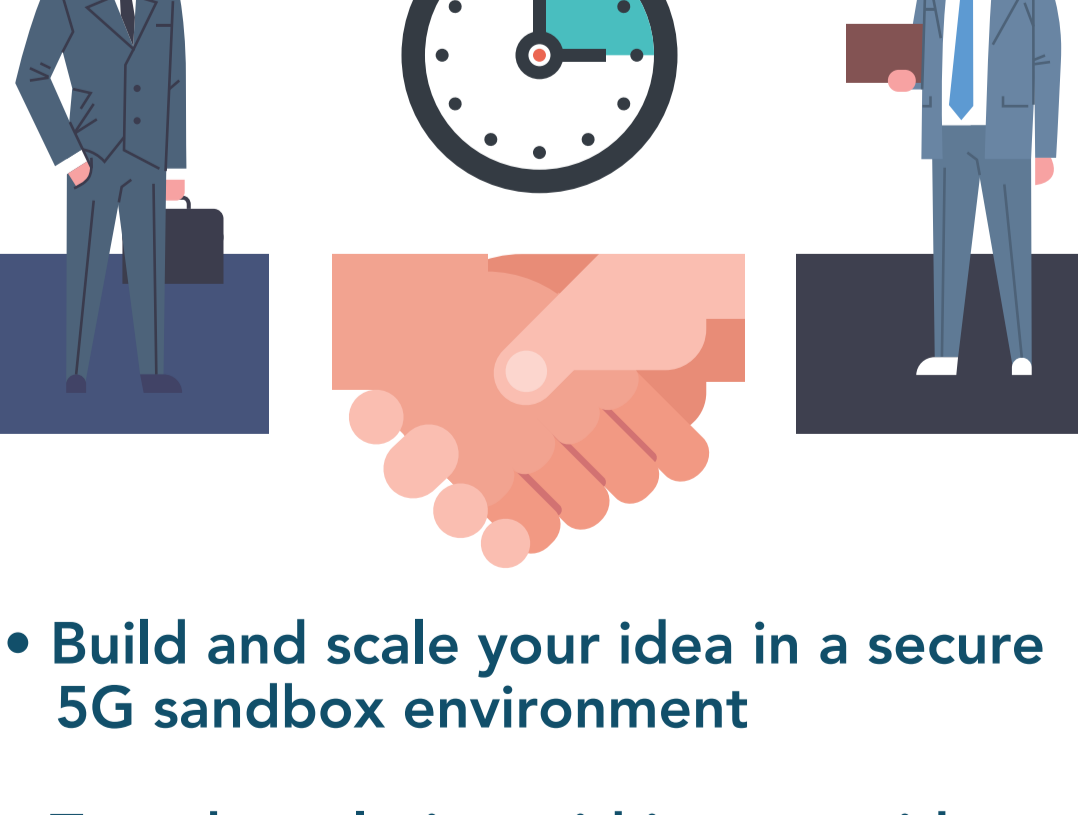

- Bring us a specific business problem and see how we can solve it
- Learn how Singtel's technology can power 5G conceptual solutions
- Plug into direction and mentorship from our team of on-hand experts

## Spotlight on... Innovation insights

- Co-collaborate with our team of 5G experts on prototyping
- Bring business solutions to life by creating working prototypes
- Take the chance to model, build, test and iterate your idea.
- Create working Proofs of Concept in a 5G sandbox environment

## Spotlight on... Ecosystem development

- Build and scale your idea in a secure 5G sandbox environment
- Test the solution within your wider team and partner network
- Leverage our tools and facilities
- Get support from our 5G product engineering and R&D teams
