Terms and Conditions apply.

2Gbps Fibre Home Bundle allows for the maximum throughput of 1Gbps per network port, and an aggregated maximum throughput of 2Gbps per household. Speed testing on any individual port will show a maximum throughput of 1Gbps. You can expect a combined total bandwidth of 1.6-1.8Gbps* for our 2Gbps Fibre Home Bundles. For a single connection from a device/laptop over wired Gigabit Ethernet LAN, the typical local download speed will be between 884.04Mbps - 986.22Mbps#, as validated in July, August and September 2017 based on more than 600 measured readings.

* The expected combined total concurrent download bandwidth is computed from measuring 2 concurrent download readings over 2 wired Gigabit Ethernet LAN connections.

The typical download speed range is computed to reflect that, at least 90% of the time, a user should experience the lower bound speed or higher over a single Gigabit Ethernet LAN connection.
