7. The price tier (where applicable) will be reviewed on a quarterly basis. The price for the quarter will apply to new and renewed circuits. For the avoidance of doubt, the price tier for the first quarter shall be determined by the total number of eligible service circuits in aggregate as at the day before the effective date of the Customised Scheme contract term.
8. A term discount of 5% will apply for circuits contracted for at least two (2) years.

**Key Terms and Conditions:**

1. The contract term for the Customised Scheme is three (3) years and the minimum contract term for each circuit subscribed under the Customised Scheme is one (1) year.
2. Circuits under Package 1 will continue to be charged at the customised price after the expiry of the initial circuit contract term for the duration of the Customised Scheme contract term. For the avoidance of doubt, if the circuit was not within contract when it was subsumed under the Customised Scheme, it will still be charged at the customised price.
3. Existing circuits must be re-contracted under the Customised Scheme in order to enjoy the customised prices under Package 2. However, the applicable premature termination charges will apply subject to paragraph 5. The Customer may also opt to complete the existing circuit contract term prior to re-contracting the circuit under the Customised Scheme. After the expiry of circuit contract term of a service under Package 2, the customer will continue to be charged at the applicable customised price until the Customised Scheme contract term expires.
4. All existing DigiLink, MetroEthernet and Meg@POP EVPL EthernetLink Point-to-Point with Premium Real Time Class of Service circuits will be automatically subsumed under Package 1 of the Customised Scheme. For the avoidance of doubt, the existing circuits need not be renewed under the Customised Scheme to enjoy the customised tariffs.
5. Only new and renewed Meg@POP IPVPN eLite, IPVPN iLink, IPVPN BizLink, IPVPN SymLink, IPVPN vLink and IPVPN EthernetLink will be subsumed under

Package 2 of the Customised Scheme. For the avoidance of doubt, the waiver of the premature termination charge for early re-contract will apply.

6. The customer is required to commit to the following minimum spending:
  - a) annual spend of at least S\$13M on DigiLink, MetroEthernet, Meg@POP and GigawaveLite services subscribed under the Customised Scheme for the duration of the Customised Scheme contract term; and
  - b) total 3-year spend of at least S\$52M on DigiLink, MetroEthernet, Meg@POP and GigawaveLite services subscribed under the Customised Scheme.
7. For the avoidance of doubt, the minimum spend will comprise of the spending from the customer and its subsidiary.
8. In the event that the customer fails to meet the minimum revenue commitment(s), the customer shall pay SingTel the shortfall.
9. Spending on value added services and One-time charges may not be counted towards the revenue commitment.
10. In the event that the customer opts to subscribe to services under Service Package 2 at the promotional price or list price, this expenditure will be counted towards the revenue commitment on condition that these promotional and/or list prices are lower than the customised prices. For the avoidance of doubt, spending on circuits subscribed under a promotion(s) that have expired and therefore reverted to list price will be counted towards the revenue commitment.
11. There shall be no auto-renewal for the Customised Scheme.
12. The customer shall not resell the services subscribed under the Customised Scheme “as is” or as standalone DigiLink, MetroEthernet and Meg@POP services but may use the services as part of its own network to offer its own services.
13. In the event that the prevailing list price for any service(s) offered under the Customised Scheme is lower than the customised price, either customer or SingTel may initiate negotiations with the other party, for the sole purpose of reviewing and determining the price that shall apply for future orders for that specific service. For the avoidance of doubt, any new prices negotiated will be filed for the IDA’s approval.
14. Service Package 1:

- a) During the negotiation period, all new and existing circuits of the affected service(s) shall be charged at the prevailing list prices until the parties mutually agree in writing on the pricing for future orders.
- b) The new mutually agreed price shall apply to both new and existing circuits including upgrade and renewal orders from a mutually agreed date and will be included as part of the Customised Scheme.

15. Service Package 2:

- a) During the negotiation period, all new and upgraded circuits of the affected service(s) shall be charged at the prevailing list prices until the parties mutually agree in writing on the pricing for future orders.
- b) The new mutually agreed price shall apply to both new and upgraded circuits from a mutually agreed date and will be included as part of the Customised Scheme.

16. The one-time installation charge shall be waived for any bandwidth upgrade within the same service provided that service is at the same location, the upgraded service starts a new contract term from the date of upgrade and the upgraded contract value is higher than the remaining contract value of the existing circuit.

17. Relocation

a) Service Package 1

- The customer may request for the relocation of one end of a service. The relocation charge shall be equivalent to the one-time installation charge as stipulated in Annex 2. Relocation of both ends of the Service shall be deemed to be a request for the termination of that Service and a request for the supply of a new Service at the requested location in which case the relevant premature termination and One-time charges shall apply.

b) Service Package 2

- Relocation of Tail End: If the customer requests for any Tail End to be relocated, the customer must produce evidence that the customer's end user is relocating from its existing location to the new location, failing which the request for relocation shall be deemed as a request for termination and a request for new supply of the Service at the requested location in which case the relevant premature termination and One-time charges shall apply.
- Relocation of Head End: If the customer requests for any Head End to be relocated, the request for relocation shall be deemed as a request for termination and a request for new supply of a new Service at the requested

location in which case the relevant premature termination and One-time charges shall apply.

- For clarity, in the event that relocation and bandwidth upgrade of the service occur concurrently, the relocation terms shall continue to apply.

- b. All other terms and conditions of the SingTel DigiLink, MetroEthernet and Meg@POP retail and wholesale services shall apply.
